LET'S TALK MONEY.

In this course, you will learn how to make funny and creative videos which you will then run online ads with every month to flood your online store, physical location, or service customer lists.

I don't want you to start feeling overwhelmed like Oh my gosh here's another course I'm taking. Those are the only two goals you're going to be focusing on and we're going to make it as easy as possible so you can start making more money now:

Two goals:

- 1) make a GREAT VIDEO AD
- 2) RUN ONLINE ADS

WHY OUR SYSTEM WORKS

PSYCHOLOGY OF VIDEO

On average video ads get 2x more clicks than simply using pictures.

Video ads also get up to 30% more conversions (aka turning a click into a customer) than picture ads.

What these stats tell you in plain English is that using video ads is much cheaper than using picture ads online

So why don't more people use video ads? Because it's SCARY and they don't have a course and mentors like us to show you how do this the right way!

BIG BRANDS

In the age of social media we tend to write off video ads as if brands such as mcdonald's, Ford, or any other brands you can think of haven't been creating video ads for more than 80 years since television was invented.

If Video Ads did not produce profit (aka: commercials), big advertiser would have stoped decades ago making commercials.

You want to know the only thing that changed? With the power of social media ads, big brands, and you, can target your audience better which means lower costs to get customers, you are living in the Golden Age of video marketing.

GETTING STARTED

HOW TO START (WE WILL TEACH YOU ALL OF THIS IN THIS COURSE!)

This is going to be a piece of cake! I am going to summarize all the steps needed to scale your business with videos below:

- *Build your F.R.E.D (Ideal Customer Avatar) so you know how to mesmerize and move your local customers*
- *Write a unique and funny ad script for your ideal customer in 5 minutes!*
- *Film and Edit the ad within 10 minutes.*
- *Program ads correctly with this video on social media to start getting customers....FAST!*

Then rinse and repeat every month. It's that simple!

ALL YOU NEED

A Phone with a camera OR a Camera and a Laptop or computer

I'm pretty sure you already have all of these items and if not....what are you living under a rock?!

CREATE YOUR FRED (ideal customer avatar)

why is this important and how will you use this in your marketing?

1) When you identify your perfect customer, you will learn how to attract these people instead of just attracting everyone, including people who won't buy and will only waste your time. Your job is to use your marketing money in the most effective manner, which means writing and creating videos that speak to the people most likely to give you their money.

Without building your Fred, you will never know who this person is and not only that as your company grows and you add more marketing you'll need to have this established.

2. How will we use this information? Use this information to write your video ad scripts and to write the text and headline copy that will help move your customer to the next step, aka visiting your store or contacting you to book an appointment, etc.

This step will take an estimated five to thirty minutes max. The only way it will take longer is if you don't know anything about your customers, which I'm sure is not the case.

CREATE YOUR FRED

Fred is your target customer. F.R.E.D is an acronym for your customers Fear, Results, Expectations, Desires. It's important to identify your Customer's F.R.E.D because if you don't, then you will have a hard time writing commercials that speak to and inspire your ideal customers to buy from you. You also do not want to attract BAD customers....Unless you are weird!!!

P.S F.R.E.D Acronym was created by Jim Edwards and we HIGHLY encourage grabbing a copy of his book Copywriting Secrets which dives DEEP into how to write good Sales Copy!

Why is creating your F.R.E.D Avatar important for creating video ads that SELL!?

People buy what they want, not what they need. If you write your video ads based off of this, you will practically PRINT MONEY!!

People may need to lose weight and eat healthily, but they want to eat McDonald's. So their videos talk about how quick, affordable, convenient, and delicious McDonald's is!

When you really understand your customers mind, you will be able to write videos FAST that will inspire them to buy from you....FAST! Why? Because you understand them, duh ;)

Story Board

What is a Story Board and how do you create one?

A Story Board is literally the list of shots or angles you need to film throughout the commercial. If your commercial is easy enough, you may not need to do this. However, if your commercial is more intricate, please watch the video below!

TEMPLATE WILL BE AVAILABLE ON NEXT PAGE

THE CASTING

BEFORE SHOOTING:

One of the biggest questions is who is gonna be the face, or the star of this video ad you are filming?!?

You have 3 options:

1. YOU can start in this video and play all the characters in the video.
 - a. This will help you fit build rapport with your local community so when people hire your service come or come into your store they have your face in their mind and are happy to buy from you because they have built trust.
2. You can ask friends, family, or post online that you're looking for an actor or actress to start in your video ad. This will make your video ad and company look very professional to your potential customers
 - a. The downside would be the fact that you may have to pay people unless they're willing to do it for free and now you're dealing with more people involved which means more organizing.
3. You mix and match the two above. One month you start in the commercial yourself to build rapport with your local community, And then the next month you get friends and families involved and have a good time filming the video.

THE CASTING

WHERE TO FIND TALENT TO STAR IN YOUR VIDEO ADS?

If you go with option 1:

It's you! Problem solved! Get ready to go "Hollywood"!!

If you go with option 2:

You will need to find somebody who is good in front of camera if not none of this will work

- 1) Post on your social media that you are looking to "Talent"*
- 2) Message Friends and Family*
- 3) post on Backstage (a website where professional actors submit themselves for work or projects)*

** If you decide to go to professional route, you're gonna have to hold a casting to make sure you choose the right people and you will probably have to end up paying them. We Recommend using backstage route once you're more familiar with filming. Start with the 1st two options to gain experience!*

*If you are interested in casting professional actors, ask us how to do it in our free Facebook group. Here is the link. **FACEBOOK GROUP***

THE FUN PART. Filming !!

YOU WILL LEARN THIS IN THE UPCOMING SECTION

- **DIRECTING:** It will be your job to make sure everyone is acting how you imagined they would in your head!
- **CINEMATOGRAPHY:** A Fancy word for making sure you set up the camera in the correct angle so your shot looks like you imagined it! You will plan all of this in your storyboard.
- **AUDIO:** A good video is TRASH if the audio sucks. So make sure you either are close enough to the person you are filming, or get a phone lavalier mic (explained in gear list you may need)

THE PREP

BEFORE SHOOTING CHECKLIST:

- You will need your phone, a light (if you have one), and a microphone (if you need or have one)(more info in the Facebook group)
- Location Make sure you know where you are filming and that it wont be too distracting or noisy!
- Make sure you have your storyboard ready to go.
- make sure actors are ready for your shoot date

THE SHOOT

SHOOTING:

the fun part! this is the part where you start sharing your business' goals and how you will help improve your customers lives!

You have the script, you have the talent, you have your phone....JUST SHOOT THE DAMN THING AND HAVE FUN!!!

this is where your creative juices start flowing and this is the first step to flooding your store with customers make sure you enjoy it!

p.s Don't forget to have the script and the storyboard handy so you know exactly what shots you need and you can film efficiently.

EDITING

Now it's time to put your video together!

We recommend using the APP Cap Cut. It is Free and the paid version is CHEAP

That way, all the "clips" and footage is in your phone. All you have to do is put the clips in the correct order.

**Make sure you add sound effects or background music to parts that need it (capcut can do this for you)*

**Make sure you add captions to your ads as MANY people on social media watch ads without sound. An example would be someone who is at work scrolling through their phone, they don't want their coworkers or boss to see that they're on their phone it's sad but it's true*

EDITING

1. Importing Footage: Gather all your video clips, audio tracks, and images, and import them into your video editing software.

2. Organizing Assets: Sort and label your media files into folders or bins for easy access, grouping by scenes, types of shots, or audio tracks.

3. Creating a Rough Cut: Drag and drop your clips onto the timeline to create a rough draft of your video, trimming and arranging them to establish the flow of the story.

4. Adding Effects and Transitions: Enhance your video by incorporating visual effects, transitions between scenes, and adjusting color grading to achieve the desired look.

5. Finalizing and Exporting: Review the entire video for any final edits, add titles or credits, ensure audio levels are balanced, and then export your project in the desired format and resolution.

LET'S EDIT YOUR COMMERCIAL.

NEEDED:

ANY EDITING SOFTWARE. WE USE CAP CUT, OR DAVINCI RESOLVE 19, A FANTASTIC ALL-IN-ONE TOOL FOR EDITING VIDEOS, ENHANCING COLORS, AND MANAGING AUDIO.
